Three Days Add-On course on Internet of Things: IOT Abridged from Micro to Nano

- Name of the Event** : A three days add on course on
"Internet of Things: IOT Abridged from Micro to Nano"
- Conducted by** : Department of Electronics and Communication Engineering
- Event Organizer** : Dr.P.Geetha, Dr.N.Vithyalakshmi, Ms.B.Gowthami
- Schedule of the Event** : 17-19 May, 2017
- Target group** : M.Tech (DECS, VLSI & CMS)

Event Objectives:

1. To impart knowledge in fundamentals of Internet of Things.
2. To develop skills in analysis, design, problem solving, and selection of appropriate techniques to develop IOT from micro to nano.
3. To inculcate attitude towards solving societal issues using micro and nano IOT techniques.

COURSE OUTCOMES: After successful completion of the Event, the participants will be able to:

- CO1.** Demonstrate fundamental knowledge in (PO1)
- Understanding IOT Concepts,
 - Identifying basic IOT issues,
 - Creating new designs using IOT technology.
- CO2.** Analyze the functioning of micro and nano based Internet of Things. (PO2)
- CO3.** Design solutions for complex engineering problems using micro and nano based IOT. (PO3)
- CO4.** Select and apply appropriate techniques and Resources to solve complex engineering problems. (PO5)
- CO5.** Work effectively as an individual or as a group member or leader in the field of micro and nano based Internet of Things. (PO9)
- CO6.** Communicate effectively on complex engineering activities with the engineering community and with society (PO10)
- CO7.** Demonstrate knowledge of engineering and management principles and apply these to one's own work, as a member and leader in a team. (PO11)
- CO8.** Able to engage in life-long learning in the field of micro and nano based Internet of Things.(PO12)

Event Description:

The IOT connected devices number is increasing, as researchers have begun contracting sensors from microns to the nanometer scale in size. The low-priced microsensors and microprocessors that are paired with small power supply antennas move toward an Internet of Nano Things (IoNT) that could take energy efficiency, and numerous different segments to a radical new dimension.

Schedule Plan

Day-1:

- Introduction to Internet of Things; micro and nano based Internet of Things.
- Role micro and nano based Internet of Things in every one's day-to-day life.
- Significance of the micro and nano based Internet of Things
- Dominance of micro and nano based Internet of Things in very near future.

Day-2:

- Current Status & Future Prospect of IoT
- Knowledge Management – From Data to Wisdom
- The Future of micro based Internet of Things
- The Potential of micro based Internet of Things Few Applications of IoT
- Technological Challenges of micro based Internet of Things
- Criticisms & Controversies of micro based Internet of Things

Day-3:

- Introduction to role of Nano in IOT.
- Real Life Examples of Nanotechnologies Driving Future of IOT
- Illustration of future Nano electronics in IOT
- Research problems in IOT: Nano
- Research Scope for IOT: Nano in SVEC.

Name of the Event: Add-on Course on "Design and Simulation of Antennas for Future Wireless Communication Systems"

Conducted by: Department of E C E

Event Organizer: Mr. G.Guruprasad, Mr. Sai Rajanarendra

Schedule of the Event: 04-05 May, 2017

Target group: III Year ECE

Event Objectives:

- ❖ To impart knowledge in fundamentals of Emerging Antenna Technologies
- ❖ To develop skills in analysis, design, problem solving, and selection of appropriate techniques for simulation of Antennas using a novel tool Zealand's IE3D software which will be very useful for them to do projects in the area of RF Design and Simulation.
- ❖ To inculcate attitude towards solving societal issues.

Course Outcomes

On Completion of the course, the students will be able to

- CO1** Demonstrate knowledge in
- Emerging Antenna Technologies
 - Reconfigurable Antennas
 - Reconfiguration Techniques
 - Reconfigurable Antennas using different reconfiguration Techniques.
 - Applications of Reconfigurable Antennas
- CO2** Analyze different types of Reconfiguration Technique in the design of Reconfigurable antennas for conducting research.
- CO3** Design and simulation of Antennas using IE3D software.
- CO4** Solve engineering problems in the core area of Antenna design for Future Wireless Communication Systems.
- CO5** Use the IE3D software tool for simulation of Antennas to verify their performance.

Program Outcomes

- PO1:** Demonstrate fundamental knowledge of mathematics, sciences and electronics and communication engineering.
- PO2:** Perform analysis of electronics, signal processing and communication circuits and systems.
- PO3:** Design and develop electronics, signal processing and communication subsystems and systems.
- PO4:** Solve problems in electronics; signal processing and communication circuits and systems.
- PO5:** Use electronics and communication principles and modern tools to modern systems and networks.
- PO6:** Create solutions of social context with the impact of electronics and communication engineering..
- PO7:** Practice electronics and communication engineering in compliance with environmental standards..
- PO8:** Follow ethical code of conduct in professional activities.
- PO9:** Achieve personal excellence and ability to work in groups.
- PO10:** Develop effective communication in professional transactions.
- PO11:** Work effectively in projects as a member in a team and leader with understanding of engineering and management principles.
- PO12:** Engage in lifelong learning and to adapt in a world of constantly evolving technology.

Event Description:

Simulink is a block diagram environment for multidomain simulation and Model-Based Design. It supports simulation, automatic code generation, and continuous test and verification of embedded systems. Simulink provides a graphical editor, customizable block libraries, and solvers for modeling and simulating dynamic systems. It is integrated with MATLAB, enabling to incorporate MATLAB algorithms into models and export simulation results to MATLAB for further analysis.

Schedule Plan:

Day-1: Introduction to MATLAB Simulink and some basic electrical and logic system models verification-hands on training.

Day-2: Functionality Verification of communication systems through different modulation schemes. Additionally image processing toolbox is introduced with several examples-hands on training

The student was able to understand a novel tool MATLAB Simulink and can verify the different system functionalities which have studied in their curriculum and also learned different commands to perform operations on images.

Dept. of Electronics & Communication Engineering
Two Day Add-On course *Image Processing and Its Applications using*
MATLAB

Name of the Event: A two day add on course on "*Image Processing and Its Applications using MATLAB*"

Conducted by: Department of E C E

Event Organizer: Ms.G.Komala Yadav,Mr.M.Venkataresh,Mr.B.Mahesh

Schedule of the Event: 27-28 April, 2017

Target group: II Year ECE

Event Objectives:

1. To impart knowledge in fundamentals of Image Processing.
2. To develop skills in analysis, design, problem solving, and selection of appropriate techniques to develop projects.
3. To inculcate attitude towards solving societal issues.

COURSE OUTCOMES: After successful completion of the Event, the participants will be able to:

CO1. Demonstrate fundamental knowledge in (PO1)

- Identifying various types of Images,
- Understanding Matlab
- Programming through Matlab

CO2. Analyze the functioning of Image Processing Tool Box . (PO2)

CO3. Design solutions for complex engineering problems using Matlab. (PO3)

CO4. Select and apply appropriate techniques and Resources to solve complex engineering problems. (PO5)

CO5. Work effectively as an individual or as a group member or leader in the field of Image Processing. (PO9)

CO6. Communicate effectively on complex engineering activities with the engineering community and with society (PO10)

CO7. Demonstrate knowledge of engineering and management principles and apply these to one's own work, as a member and leader in a team.(PO11)

CO8. Able to engage in life-long learning in the field of Image Processing(PO12)

Event Description:

Day 1: The program started at 08:00 AM. The program was inaugurated by Mr.B. Mahesh, Asst. Professor, Dept. of ECE started with a brief view about the program. He explained about the importance of the Add-on Course. He also addressed about the basics of Image Processing terminology and introduced the students to the Image Processing. The course was planned for students of IInd year ECE.

The session was later took over by Ms.G.Komala Yadav, Asst. Professor, Dept. of ECE. Her session went on with the discussion on use of DSP in speech communication problems and with Fundamental Steps of Image Processing and Techniques that are useful for implementing Various Applications in Image Processing are shown to the students practically.

Finally, she concluded the day 1 session with introducing them to the Image Processing Tool Box and Video processing block set in MATLAB which is used to develop Applications in Real Time.

Day 2: Mr.M.Venkataresh, Asst. Professor, Dept. of ECE had initiated the second day session with the basics of programming in Image Processing using MATLAB. He explained the structure of the program to be written in MATLAB and also discussed about various types of Functions and the procedures in programming and showed various Programs that are used to implement various applications in image using MATLAB. Finally the Session was concluded with the student interaction and we have demonstrated various research areas and Problems that emphasizes knowledge in the field of image processing

Event Objectives:

1. To impart knowledge in C,C++ ,Operating Systems and DBMS.
2. To develop skills in preparing Applications using C,C++ and DBMS In various Operating systems flat forms.
3. To inculcate attitude towards solving complex engineering problems In Programming by using C,C++ and DBMS.

COURSE OUTCOMES: After successful completion of the Event, the participants will be able to:

CO1. Demonstrate fundamental knowledge in

- Understanding C,C++
- Identifying basic DBMS Models.
- Creating applications In various Operating Systems Environments

CO2. Analyze the functioning of various Data Base Models using SQL and PLSQL.

CO3. Design solutions for complex engineering problems using C,C++ and DBMS various Operating Systems Environments

Event Description:

Today world is more prone to automation, Every day to day applications in various Scenarios are moved to automation, in such aspects creating knowledge in basic programming languages like C,C++, DBMS and viewing various operating systems gives pre-requisite to the students from ECE background, who are aspiring jobs in IT Industry. The total program gives an overview and sample hands on practice to the students.

Schedule Plan:

Day-1: Introduction to C,C++.

Day-2: Developing Various Programs by using C,C++- hands on training.

Day-3: Developing various data structures schemes like Queue, Stacks and linked Lists.

Day-4: Introduction to DBMS and Various Operating Systems like UBUNTU,LINUX and Windows.

Day-5: Solving various real time case studies using C,C++ and DBMS in different Operating System Flat forms.

Total Number of Students Registered	: 201
Total Number of Students Attended	: 179

Add-on Course on
“Introduction to MATLAB Simulink for
Engineering”

(12-17 OCTOBER, 2017)

Target Group: II B.Tech (ECE)

Resource Persons

Ms. H.D.Praveena, Assistant Professor

Ms. V.Navya, Assistant Professor

Ms. C.Maheswari, Assistant Professor

Ms. V.Mounika Reddy, Assistant Professor

**A Five Days Add-On Course on
"Introduction to MATLAB Simulink for Engineering"**

- Name of the Event** : A five days add on course on
"Introduction to MATLAB Simulink for Engineering"
- Conducted by** : Department of Electronics and Communication Engineering
- Event Organizer** : *Ms. H.D.Praveena, Assistant Professor*
Ms. V.Navya, Assistant Professor
Ms. C.Maheswari, Assistant Professor
Ms. V.Mounika Reddy, Assistant Professor
- Schedule of the Event** : 12-17 October, 2017
- Target group** : II B.Tech I Sem (ECE-A,B,C & D)

Event Objectives:

1. To impart knowledge in Block set based Design
2. To develop skills in modeling various systems and devices by using predefined block diagrams also on usage of GUI and fdatool.
3. To inculcate attitude towards solving complex engineering problems using MATLAB Simulink.

COURSE OUTCOMES:

After successful completion of the Event, the participants will be able to:

- CO1.** Demonstrate fundamental knowledge in
- Understanding MATLAB SIMULINK
 - Identifying basic SIMULINK models
 - Creating new MATLAB SIMULINK models
- CO2.** Analyze the functioning of MATLAB SIMULINK
- CO3.** Design solutions for complex engineering problems using MATLAB SIMULINK

Simulink is a block diagram environment for multidomain simulation and Model-Based Design. It supports simulation, automatic code generation, and continuous test and verification of embedded systems. Simulink provides a graphical editor, customizable block libraries, and solvers for modeling and simulating dynamic systems. It is integrated with MATLAB, enabling to incorporate MATLAB algorithms into models and export simulation results to MATLAB for further analysis. The student will be able to understand a novel tool MATLAB Simulink and its blockset and practically they can verify the different devices & system functionalities which have studied in their curriculum.

Schedule Plan:

Day-1: Introduction to MATLAB Simulink and signal generations using simulink- . hands on training.

Day-2: Functionality Verification of some basic systems through different blocks available in MATLAB Simulink - hands on training.

Day-3: Design of logic circuits and their functionality verification - hands on training.

Day-4: Introduction to basic electronic circuit components and devices modeling - hands on training.

Day-5: Usage of Graphical User Interface (GUI) and implementation of filters using fda tool - hands on training.

Six Day Add-On course "ABC.. IN ARDUINO"

Target Audience: II ECE

Program Code: 03

Name of the Event: A Six day add on course on "ABC...In Ardluno"

Conducted by: ACME, Department of E C E

Faculty Coordinator: R.Nagendra , P V S R Bharadwaja , M N Naveen Kumar

Event Organizer: S Baresha Valli , D Phaneendra Reddy , K Bharat Kumar Sai

Schedule of the Event: 10-16 March, 2017

Event Objectives:

1. To impart knowledge in fundamentals of Arduino.
2. To develop skills in analysis, design, problem solving, and selection of appropriate components to develop projects.
3. To inculcate attitude towards solving societal issues.

COURSE OUTCOMES: After successful completion of the Event, the participants will be able to:

CO1. Demonstrate fundamental knowledge in (PO1)

- Identifying various types of Microprocessors and Microcontrollers,
- identifying various types of open source hardware
- Understanding Arduino
- Programming an Arduino

CO2. Analyze the functioning of Arduino. (PO2)

CO3. Design solutions for complex engineering problems using Arduino. (PO3)

CO4. Select and apply appropriate tools and Resources to solve complex engineering problems. (PO5)

CO5. Assess and propose cost effective embedded solutions for environmental and societal use. (PO6)

CO6. Work effectively as an individual or as a group member or leader in the field of embedded systems. (PO9)

CO7. Communicate effectively on complex engineering activities with the engineering community and with society (PO10)

CO8. Demonstrate knowledge of engineering and management principles and apply these to one's own work, as a member and leader in a team.(PO11)

CO9. Able to engage in life-long learning in the field of embedded systems (PO12)

Event Description:

Day 1: The program started at 08:00 AM. The program was inaugurated by started with a brief view about the program by Mr.P.V.S.R.Bharadwaja, Asst. Professor, Dept. of ECE. He explained about the importance of the Add-on Course. He also addressed about the basics of microcontroller terminology and introduced the students to the ARDUINO. The course was planned for students of IInd year ECE.

The session was later took over by Mr. S.Baresha Valli, B.Tech Final year student. H session went on with the discussion on different versions of Arduino kits like UNO, MEC etc., Pin configuration of the Arduino kit, types of additional components that are used implementing a project using Arduino are shown to the students practically.

Finally, he concluded the day 1 session with introducing them to the Integrated Development Environment (IDE) interface which is used to dump the program onto the Arduino and to run it.

Mr. S Baresha Valli explaining various types of boards in Arduino

Day 2: Mr.M.N.Naveen Kumar, Asst. Professor, Dept. of ECE had initiated the second day session with the basics of programming of Arduino. Concepts regarding the IDE of the Arduino were also explained him.

Later, The session was took over by Mr. K.Bharath Kumar Sai, B.tech final year student. He explained the structure of the program to be written in Aurdiuno and also discussed about various types of sensors and the procedure to code the respective sensors. He concluded his session by stating the applications of this session.

Mr.K. Bharat Kumar Sai explaining students about several sensors using Aurdiuno.

Mr D Phaneendra explaining about IOT in reference with Aurdiono.

Day 3:

This session was initiated by Mr.R Nagendra, Asst. Professor (SL), Dept. of ECE. He discussed about the Importance of interfacing different sensors to Arduino. Concepts complex interfacing components to the Arduino were explained by the faculty. The session was later taken over by Mr. D Phaneendra, B.tech final year student. He explained the latest concepts with respect to IOT to aurdiono. The complex part of the aurdiono part was discussed by him and he concluded the event for the batch by showing an live example of the Aurdiono based sensor kit.

Initially the event was planned for three batches, but because of huge response from the students, the participants were divided into four batches. Day 1 started with Batch 1 from the next day on, one more batch got added to the sessions which were held in different rooms in parallel fashion. Each batch had complete session for three days. The program schedule went as follows,

Organizes

**Add-on Course on “CMOS Fabrication and
Design Rule Verification by using Microwind”**

(14,15 - March, 2017)

Target Group: III B. Tech ECE- A, B, C & D

Resource Persons

Mr. Madhu G.C, Assistant Professor

Ms. K. Neelima, Assistant Professor

Mr. K.S. Chakradhar Associate Professor

Dept. of ECE.

Timing: 2.30 PM to 4.30 PM

Venue: ECAD Lab

Dept. of Electronics & Communication Engineering
ACME

**Two Day Add-On course "CMOS FABRICATION AND DESIGN RULE
VERIFICATION USING MICROWIND"**
Target Audience: III ECE

Program Code: 03

Name of the Event: A two day add on course on "CMOS FABRICATION AND DESIGN
RULE VERIFICATION USING MICROWIND"

Conducted by: ACME, Department of E C E

Faculty Co-ordinator: R.Nagendra , P V S R Bharadwaja , M N Naveen Kumar

Event Organizer: Mr.Madhu G.C , Ms.K.Neelima, Mr. K.S Chakradhar

Schedule of the Event: 14-15 March, 2017

Event Objectives:

1. To impart knowledge in fabrication process and layout design rules of cmos technology.
2. To develop skills in analysis and design of cmos digital logic.
3. To inculcate attitude towards solving societal issues.

COURSE OUTCOMES: After successful completion of the Event, the participants will be able to:

CO1. Demonstrate fundamental knowledge in (PO1)

- Understand the CMOS Fabrication Process, Stick Diagrams and Layout Design Rules.

CO2. Analyze the NMOS & CMOS logic. (PO2)

CO3. Design some of the basic combinational circuits in CMOS technology. (PO3)

CO4. Apply appropriate design rules to minimize the space constraints. (PO5)

**CO5. Assess and propose cost effective VLSI solutions for environmental and societal use.
(PO6)**

**CO6. Work effectively as an individual or as a group member or leader in the field of VLSI
System Design. (PO9)**

**CO7. Communicate effectively on complex engineering activities with the engineering
community and with society (PO10)**

Three Day Add On Course On "Design, Simulation And Advancements Of Antennas"

Name of the Event: A three day add on course on "Design, Simulation and Advancements of Antennas"

Conducted by: Department of E C E

Event Organizer: Dr.V.R.Anitha, Ms.K.Neelima, Ms.K.Sudha

Schedule of the Event: 20-22 October 2016

Target group: III Year ECE

Event Objectives:

1. To impart knowledge in fundamentals of MATLAB, IE3D, FEKO and HFSS for antenna design.
2. To develop skills in analysis, design, problem solving, and selection of appropriate feeding techniques for antennas.
3. To inculcate attitude towards societal issues like impact of radiation on living beings.

Course Outcomes: After successful completion of the Event, the participants will be able to:

CO1. Demonstrate fundamental knowledge in (PO1)

- Understanding MATLAB, HFSS, IE3D, FEKO
- Identifying basic feeding techniques for antennas
- Developing new antennas

CO2. Analyze the functioning of Antennas. (PO2)

CO3. Design solutions for complex engineering problems using MATLAB, HFSS, IE3D, FEKO, etc. (PO3)

CO4. Select and apply appropriate techniques and Resources to solve complex engineering problems. (PO5)

CO5. Work effectively as an individual or as a group member or leader in the field of communication. (PO9)

CO6. Communicate effectively on complex engineering activities with the engineering community and with society (PO10)

CO7. Demonstrate knowledge of engineering and management principles and apply these to one's own work, as a member and leader in a team. (PO11)

CO8. Able to engage in life-long learning in the field of Communications. (PO12)

Event Description:

Wireless technology is one of the main areas of research in the world of communication systems today and a study of communication systems is incomplete without an understanding of the operation and fabrication of antennas. This add-on course includes how to design various antennas viz., monopole, dipole, helical, horn, microstrip patch antennas etc. Some antennas like monopole, dipole and patch are simulated using software tools MATLAB, HFSS, IE3D and FEKO. By using these sophisticated tools the simulation can be done very efficiently. Also this event includes the advanced antennas like metamaterial antennas, smart antennas, conformal antennas, reconfigurable antennas etc,

Schedule Plan:

Day-1: Introduction to Antennas, design of monopole, dipole antennas and simulation of the Same antennas using MATLAB, IE3D and FEKO softwares.

Day-2: Design of patch antenna to operate at 2.45GHz and simulation of the same using HFSS software for two different feedings i.e., strip feeding and coaxial feeding. Also its applications and its fabrication using a video are discussed.

Day-3: Advanced antennas like conformal antennas, EBG structures (metamaterial), Reconfigurable antennas significance and their applications are discussed in detail.

At the end of the course students were familiarized with design concepts of various antennas and how to simulate them using various software tools and how to analyze different parameters of the antenna. Also they learned the new advancements of antennas in various fields.

Department of Electronics and Communication Engineering

Organizes

**Add-on Course on “Basic VLSI Layout Design
Using Microwind”**

(17-18 February, 2016)

Target Group: III B. Tech ECE- A & B

Resource Person

Ms. K. Neelima
Assistant Professor,
Dept. of ECE.

Timing: 2.30 PM to 4.30 PM

Venue: ECAD Lab

Note: For registration please contact resource person before 12-02-2016.

Two Day Add-On course on *Basic VLSI Layout Design using Microwind*

NAME OF THE EVENT: A two day add on course on "*Basic VLSI Layout Design using Microwind*"

CONDUCTED BY: Department of ECE

EVENT ORGANIZER: Ms. K. Neelima

SCHEDULE OF THE EVENT: 17-18 February, 2016

TARGET GROUP: III Year ECE

EVENT OBJECTIVES:

1. To impart knowledge in fundamentals of Layout Design for VLSI Circuits.
2. To develop skills in design and problem solving in the development of Layouts for CMOS Designs.
3. To inculcate attitude towards solving societal issues.

COURSE OUTCOMES:

After successful completion of the Event, the participants will be able to:

- CO1.** Demonstrate fundamental knowledge in (PO1)
- Developing CMOS circuits,
 - Understanding Layouts and Microwind Tool,
 - Development of Layouts using Microwind Tool.
- CO2.** Analyze the various options provided in Microwind Tool. (PO2)
- CO3.** Design solutions for CMOS digital circuits to develop Layouts using Microwind Tool. (PO3)
- CO4.** Select the corresponding options in Microwind Tool and use them to solve complex engineering problems related to layout development at circuit level abstraction. (PO4)
- CO5.** Use Microwind Tool to develop Layouts for CMOS circuits. (PO5)
- CO6.** Work effectively as an individual or as a group member or leader in the field of IC Physical Design Automation. (PO9)
- CO7.** Communicate effectively on complex engineering activities with the VLSI

- CO8.** Demonstrate knowledge of engineering and management principles and apply these to one's own work, as a member and leader in a team. (PO11)
- CO9.** Able to engage in life-long learning in the field of VLSI Physical Design Automation. (PO12)

EVENT DESCRIPTION:

Microwind Tool is a Layout Development Tool used to develop layouts for CMOS based Circuits at various technologies. It is devised to verify the physical layer information of the circuit level designs for the specified technology well suited for CMOS Circuits. The digital logic circuits using CMOS at various levels of integration can be verified using this.

Schedule Plan

Day-1: Introduction to Layout Design using CMOS Circuit examples and Microwind Tool.
Day-2: The development of Layouts for the given CMOS logic and Verification for the parameters like power dissipation, delay, rise time, fall time, MOS Characteristics, etc.
 The student was able to understand development of Layouts using CMOS Logic and Verification for various parameters from the add-on course and able to develop Layouts on their own for various levels of integration and analyze the functionality of the design for the given specifications and constraints.
