About The College

Sree Vidyanikethan Engineering College was established in the year 1996 by Sree Vidyanikethan Educational Trust (SVET) under the stewardship of Dr. M. Mohan Babu, a renowned film artiste and former Member of Rajya Sabha with the noble objective of promoting Technical Education in the backward region of Rayalaseema. The College is situated in lush green and scenic surroundings, 15 km from the temple-town of Tirupati on the Tirupati-Madanapalli National Highway (NH-205). The College is well connected by RTC Buses plying between Tirupati-Piler- Madanapalli every 10 Minutes.

The College is approved by All India Council for Technical Education(AICTE), New Delhi and is affiliated to Jawaharlal Nehru Technological University Anantapur, Anantapur. University Grants Commission (UGC), New Delhi has conferred Autonomy to the College for a period of six years with effect from the academic year 2010-2011. The College established in 1996 with an initial intake of 60 in each of the three branches EEE, ECE and CSE has registered spectacular growth in a span of 15 years and now the College offers 10 UG courses & 8 PG courses.

Department of Mechanical Engineering

The Department of Mechanical Engineering in Sree Vidyanikethan Engineering College was established in 2011 with an intake of 60. In the year 2012-13, intake has been increased to 120 students besides starting a diploma course with an intake of 60 students. In the academic year 2013-2014 intake has been increased to 180. The Department also meets AICTE norms for cadre ratio. Most of the faculty members have PG/Ph.D qualifications. The Department is also supported with ten lab technicians. Mechanical Engineering is the mother of all branches. The contribution of this branch is enormous in the growth of technology over the centuries.

Objectives of the STP

The Two Day Staff Training Programme aims to develop the Technical Skills on Machine Shop Practices. This course directs the lab technicians to use basic machine tools: drilling machines, lathe, milling machine, shaper, and precision grinders. After completing the program, the participant will be able to acquire the basic theoretical and practical knowledge in conducting experiments on machine tools lab. This program covers an introduction to theory on machine tools and machine shop practices along with hands on experience on various machine tools.

Course Content

- Introduction to Machine Shop Practices and tools.
- Demonstration on usage of cutting and machine shop tools.
- Introduction to various machine tools.
- Hands-on-Training on lathe machine.
- Hands-on-Training on special machine.
- Maintenance and safety issues in Machine Shop
- Live demonstration of various operations on lathe and special machines

Resource Persons
Experts from various industries and academia.

Eligibility
This program is open to all the Mechanical and Production Engineering Department Lab Technicians of AICTE approved Engineering colleges, Polytechnic colleges with ITI / DME qualification.

Registration fees: No Registration fees (Participants are selected on first come first serve basis. Selected participants will be informed through e-mail only).

Students' Feedback

1. More shortcut methods to be discussed (Aptitude and Reasoning).
2. More practice tests to be done.
3. Concentration is more on basics.
4. Complexity of the problems to be discussed more.
5. More problems to be solved.
6. Doubts to be clarified in separate sessions.

Key Findings:

1. Attendance is low on every Friday and during public holidays (as students go to GATE/GRE/CAT etc. coaching).
2. Extracurricular activities like paper presentation in seminars, project report evaluation also contributed to a fall in attendance.
3. Students are satisfied with basics of learnings (reasoning and aptitude).
4. Online practice tests are conducted for students on all the areas.
5. Doubts are clarified during after hours.

a. Measure taken to reduce absenteeism of students:

1. Daily monitoring of attendance by PAT Office and PAT Coordinators.
2. Daily visits to each and every training program venues to motivate the students on the benefits of this program.
3. Students were warned and intimated that their names will be removed from the Placement database in case of absenteeism.
4. Removed a few from each class – regular absentees.

Title of the project: **Digital Ordering System for Restaurants Using Android**

Statement of the project: Implementation of Network-based Smart Order, Providing Security to the information and Server maintenance.

To overcome the limitations of above system, we proposed this digital dinning system based on android technology. It is a wireless food ordering system using android devices. Android devices have gained immense popularity and have revolutionized the use of mobile technology in the automation of routine task in wireless environment. Android is a Linux based operating system for mobile devices such as smart-phones and tablets. Considering the promising future of Android market, it is beneficial and worth to write applications for android that target masses of people.

The proposed system has the following advantages.

- User Friendly Interface
- Fast Access to Database
- Less Errors
- More Storage Capacity

Students' Feedback

1. More shortcut methods to be discussed (Aptitude and Reasoning).
2. More practice tests to be done.
3. Concentration is more on basics.
4. Complexity of the problems to be discussed more.
5. More problems to be solved.
6. Doubts to be clarified in separate sessions.

Key Findings:

1. Attendance is low on every Friday and during public holidays (as students go to GATE/GRE/CAT etc. coaching).
2. Extracurricular activities like paper presentation in seminars, project report evaluation also contributed to a fall in attendance.
3. Students are satisfied with basics of learnings (reasoning and aptitude).
4. Online practice tests are conducted for students on all the areas.
5. Doubts are clarified during after hours.

a. Measure taken to reduce absenteeism of students:

1. Daily monitoring of attendance by PAT Office and PAT Coordinators.
2. Daily visits to each and every training program venues to motivate the students on the benefits of this program.
3. Students were warned and intimated that their names will be removed from the Placement database in case of absenteeism.
4. Removed a few from each class – regular absentees.

Title of the project: **Digital Ordering System for Restaurants Using Android**

Statement of the project: Implementation of Network-based Smart Order, Providing Security to the information and Server maintenance.

To overcome the limitations of above system, we proposed this digital dinning system based on android technology. It is a wireless food ordering system using android devices. Android devices have gained immense popularity and have revolutionized the use of mobile technology in the automation of routine task in wireless environment. Android is a Linux based operating system for mobile devices such as smart-phones and tablets. Considering the promising future of Android market, it is beneficial and worth to write applications for android that target masses of people.

The proposed system has the following advantages.

- User Friendly Interface
- Fast Access to Database
- Less Errors
- More Storage Capacity
- Search Facility

Recall
SREE VIDYANIKETHAN ALUMNI
Building Relationships. Creating Memories.

It's time to time-travel.
To a bygone era.
Honest laughter and classroom chatter.
Times when time would be fleeting.
When you didn't care if you were caught cheating.

To memories that are golden, silver and precious.
Restless, breathless moments have never been in vain.
Let's relive that time, one more time.
We only part, to meet again.

IIRS Outreach Programme

Basics of Remote Sensing, Geographical Information System and Global Navigation Satellite System

August 21 – December 01, 2017

Organised by

Indian Institute of Remote Sensing
Indian Space Research Organisation
Department of Space, Govt. of India
Dehradun

Course Announcement

IIRS announces four courses commencing from ***August 21st, 2017***

- ***Remote Sensing and Digital Image Analysis*** *(21/08/2017 to 15/9/2017): Basic Principles of Remote Sensing, Earth Observation Sensors and Platforms, Spectral Signature of different land cover features, Image interpretation, Thermal & Microwave Remote Sensing, Digital Image Processing: Basic Concepts of Rectification and Registration, Enhancement, Classification and accuracy assessment techniques.*
- ***Global Navigation Satellite System and Geographical Information System*** *(**25/09/2017 to 10/11/2017**): Introduction to GPS and GNSS, receivers, processing methods, errors and accuracy, GIS, databases, topology, spatial analysis and open source software.*
- ***RS and GIS Applications*** *(**13/11/2017 to 01/12/2017**): Agriculture and Soil, Forestry and Ecology, Geoscience and Geo-hazards, Marine and Atmospheric Sciences, Urban and Regional Studies and Water Resources.*
- ***Basics of Remote Sensing, GIS and GNSS*** *(**21/08/2017 to 01/12/2017**): Comprehensive course consisting of above three courses.*

The participants can register for ***individual course*** *of their choice or the* ***entire Programme***.

Target Participants

- *Student of Undergraduate and Postgraduate courses (any year);*
- *Technical/ Scientific Staff of Central/ State Government Ministries/ Departments;*
- *Faculty / Researchers at university / Institutions.*

Course Study Material

Course study materials such as lecture slides, video recorded lectures, open source software, data & handouts of demonstrations, etc., will be made available through IIRS ***ftp*** *link (ftp://ftp.iirs.gov.in) Video lectures will also be uploaded on YouTube Channel (http://www.youtube.com/user/edusat2004).*

Course Fee

There is ***no course fee***.

Course Registration

Course updates and other details will be available on URL- ***http://www.dlp.iirs.gov.in***

- *To participate in the program, organizations/universities/departments/ Institutes have to identify a Coordinator at their end. The coordinator is required to register his/her Institute as nodal centre at: (http://elearning.iirs.gov.in/edusat_lms/cordinator_registration.php).*
- *All the participants have to register online through registration page (http://elearning.iirs.gov.in/edusat_lms/student_registration.php) by selecting his/her organization as nodal centre.*
- *The Coordinator is required to approve the participants from his/her institute for each course.*

Course Funding & Technical Support

The programme is sponsored by Indian Space Research Organization, Department of Space, Government of India and is conducted with due technical support from Amrita Virtual & Interactive E-learning World (A-VIEW).

Programme Reception

Programme can be received through Internet connectivity of 2Mbps or better. Following hardware and software set-up is required at user end:

IIRS Outreach Programme

The IIRS outreach programme, which started in 2007 with 12 universities/ institutions has now grown substantially. Currently, 561 universities / institutions spread across India covering 30 States and 2 Union Territories are networked with IIRS. The beneficiaries of the programme may include:

- Central/State/Private Universities & Academic Institutions
- Central & State Government Departments
- Forest Resource Professionals
- State Forest Departments/Forest Training Academies
- Research Institutes
- Geospatial Industries
- NGOs

Feedback Mechanism

IIRS has conducted six workshops in 2007, 2009, 2010, 2013, 2014, 2015, 2016 and 2017 to take feedback from participating institutions to improve the quality of future courses.

Seventh outreach programme feedback session during IIRS User Interaction Meet (IUIM)-2017

Awards

IIRS has received national awards for excellence in training for outreach and e-learning programme during 1st National Symposium on Excellence in Training conducted during April 11-12, 2015 in New Delhi by Department of Personnel & Training (DoPT), Govt. of India in collaboration with United Nations Development Programme (UNDP).

About IIRS

Indian Institute of Remote Sensing (IIRS) under Indian Space Research Organisation (ISRO), Department of Space, Govt. of India is a premier Training and Educational Institute set up for developing trained professionals in the field of Remote Sensing, Geoinformatics and GNSS Technology for Natural Resources, Environmental and Disaster Management. Formerly known as Indian Photo-interpretation Institute (IPI), founded in 1966, the Institute boasts to be the first of its kind in entire South-East Asia. While nurturing its primary endeavour to build capacity among the user community by training mid-career professionals, the Institute has enhanced its capability and evolved many training and education programmes that are tuned to meet the requirements of various target groups, ranging from fresh graduates to policy makers including academia.

IIRS also conducts e-learning programme on Remote Sensing and Geoinformation Science (*http://elearning.iirs.gov.in*).

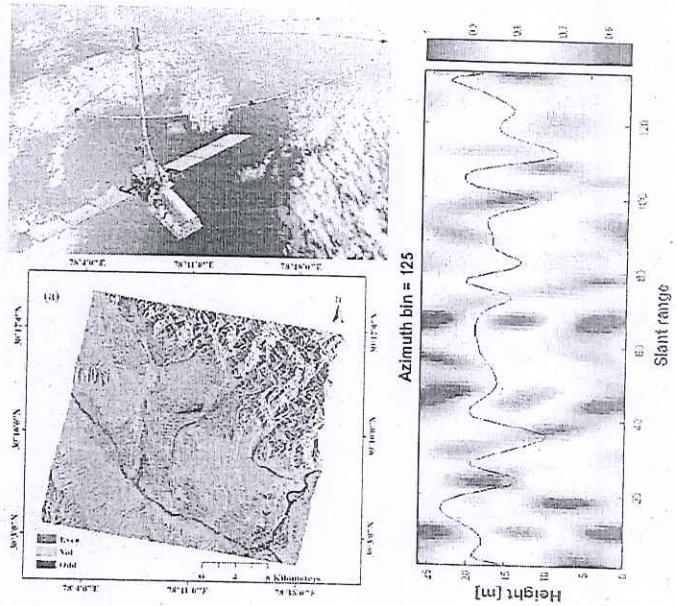
Twentieth IIRS Outreach Programme



Microwave Radar Remote Sensing and its Applications

April 10-28, 2017

Organised by

Indian Institute of Remote Sensing
Indian Space Research Organisation
Department of Space, Govt. of India
Dehradun

www.iirs.gov.in

About the Course

The advancement of earth observation has opened new avenues of research in the field of earth sciences. With the technological advancements in geo-information sciences, remote sensing has become an effective method for detection and investigation of various factors. The visible and infra-red regions are known as optical regions, and the microwave region (1mm - 1m) is considered as non-optical region. Systems operating in optical region are being used for several decades and therefore, are more advanced and widely employed. However, their use is limited by availability of sunlight and interference of the atmospheric conditions such as haze and cloud cover especially in the tropical regions. Therefore, the use of microwave or radar remote sensing is preferred in such areas. Radar imaging through Synthetic Aperture Radar (SAR) systems has revolutionized and expanded the technology of Microwave remote sensing especially in geosciences applications using different techniques like SAR Polarimetry (PolSAR), SAR Interferometry (InSAR) and Polarimetric SAR Interferometry (PolInSAR). SAR systems in general helps in understanding glacier and ice movement to give better understanding on long term variation in climate, developing highly accurate and detailed elevation maps, flood and oil spill monitoring, land use and land cover change, soil moisture and biomass estimation, assessing the health of crops and forests and even in urban planning and development.

Curriculum

The course structure is spread into 4 broad topics of teaching on:

- Basics of SAR remote sensing
- SAR Interferometry (InSAR)
- SAR Polarimetry (PolSAR)
- SAR Remote Sensing Applications

Following topics will be covered in this course

- Overview of SAR Remote Sensing
- SAR Data Format and Acquisition Mode
- SAR Data Processing
- Basic concepts of SAR Interferometry
- Polarimetric SAR Remote Sensing and Applications
- Forest Parameter Retrieval using SAR Remote Sensing
- SAR Remote Sensing for Snow and Glacier studies
- SAR Remote Sensing for Flood Mapping and Monitoring
- SAR Remote Sensing for Coastal and Oceans Studies
- SAR Remote Sensing for Agricultural and Soil Studies
- SAR Remote Sensing for Geological Studies

Target Participants

The candidates who want to participate in the course should be a student of final year undergraduate course or postgraduate course (any year).Technical/Scientific Staff of Central/State Government/Faculty/researchers at university/institutions are also eligible to apply for this course. Applications of participants have to be duly sponsored by university/institute and forwarded through coordinators from respective centres. Users receiving programmes under CEC-UGC/ CIET networks can also participate. Institutions on high speed National Knowledge Network (NKN) can also participate using A-VIEW software.

Course Study Material

Course study materials like lecture slides, video recorded lectures, open source software & handouts of demonstrations, etc. will be made available through IIRS ftp link. Video lectures will also be uploaded on YouTube Channel (http://www.youtube.com/user/edusat2004).

Course Fee

There is no course fee.

Course Registration

- Course updates and other details will be available on URL- http://www.iirs.gov.in/Edusat-News/.
- To participate in this programme the interested organizations/ universities/ departments/ Institutes has to identify a coordinator at their end. The identified coordinator will register online his/her Institute as nodal center in IIRS website.
- All the participants has to register online through registration page by selecting his/her organization as nodal center.

Course Funding & Technical Support

The programme is sponsored by National Natural Resources Management System – Standing Committee on Training and Education (SC-T), Indian Space Research Organisation, Department of Space, Government of India and is conducted with due technical support from Amrita Virtual Interactive E-learning World (A-VIEW).

Programme Reception

Programme can be received through Internet connectivity of 2Mbps or better. Following hardware and software set-up is required at user end:

Hardware Requirements :

- High-end Computer/Laptop (Windows OS);
- Good quality web camera ;
- Headphone with Microphone;
- Speakers ;
- Large Display Screen (Projector or TV) .

Software and Internet Requirements

- Desktop based: A-VIEW software (free to download from www.aview.in or IIRS ftp link: ftp://ftp.iirs.gov.in)
- Online live access through http://live.iirs.gov.in with free registration.

Connectivity & Other configurations:

- NKN or any other high speed internet facility (preferably without firewall, with minimum of 2 Mbps bandwidth)
- Network requirements: Port 80 and RTMP (port 1935) protocol should be unblocked from user's computer and Firewall.

Note: Institutions/ universities have to bear total expenses for establishment of the classroom facility

Award of Certificate

Working Professionals: Based on 70% attendance and submission of assignments.

Students: Based 70% attendance and online examination.

IIRS Outreach Programme

The IIRS outreach programme, which started in 2007 with 12 universities/ institutions has now grown substantially. Currently, 470 universities / institutions spread across India covering 30 States and 2 Union Territories are networked with IIRS. The beneficiaries of the programme may include:

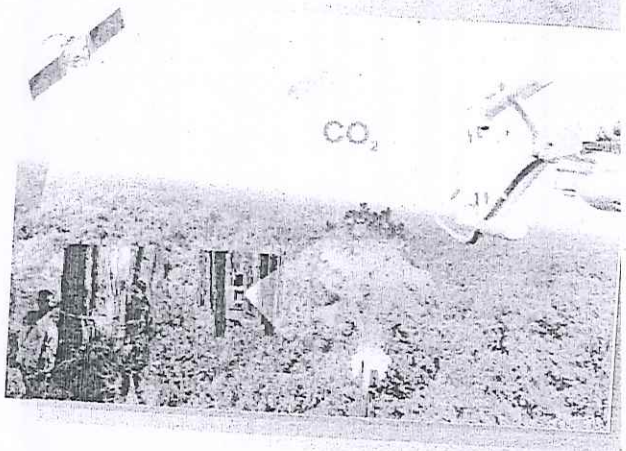
Nineteenth IIRS Outreach Programme



Remote Sensing and GIS Applications in Carbon Forestry

February 16 – March 10, 2017

Organised by

Indian Institute of Remote Sensing
Indian Space Research Organisation
Department of Space, Govt. of India
Dehradun

www.iirs.gov.in

About the Course

Forests cover approximately one third of the Earth's land surface. These have a tremendous potential to store and cycle atmospheric carbon and therefore provide an effective way to mitigate climate change. To meet the measuring and monitoring (M&M) requirements of carbon forestry project activities, it is critical to establish repeatable, objective-based, and accurate methods for estimating forest carbon pools and fluxes over large areas. Remote sensing technologies are particularly suited for mapping and monitoring of forest cover, deforestation, degradation, regrowth, carbon stock and carbon sequestration. This course will provide an overview of the latest advances in satellite and terrestrial based remote sensing and GIS technologies to support carbon forestry. The course is therefore of special interest for the foresters/professionals/researchers and students interested in learning utility of these modern technologies in the context of forest carbon monitoring (e.g. REDD+).

IIRS has successfully conducted 18 outreach programme so far with participation of over 33,000 participants from 470 Institutions/ Universities spread across India.

Curriculum

- Global carbon cycle & climate change: An overview;
- Forest-based strategies for mitigating climate change;
- Global Earth observation initiatives for carbon forestry;
- Spectral signature of vegetation and factors affecting spectral response;
- Application of satellite remote sensing in mapping and monitoring of forest cover and land use;
- Application of satellite remote sensing in mapping and monitoring of forest carbon degradation ;
- Application of satellite data in forest sampling design for biomass/carbon quantification;
- Application of optical remote sensing in forest biomass/carbon estimation;
- Application of high resolution data for forest biomass/ carbon inventory;
- Application of LiDAR in mapping of forest structure and biomass/carbon estimation;
- Application of microwave remote sensing in forest biomass/carbon estimation;
- Application of eddy covariance technique in carbon flux measurement and modelling;
- Application of satellite remote sensing in near-real time forest fire assessment and monitoring;
- Application of satellite remote sensing in forest biomass burning and carbon emission monitoring;
- Application of Geoweb portals and services in forestry studies.

Target Participants

The course is designed for professionals engaged in forest and agro-forestry resource management, planning, REDD projects and students & researchers of Forestry, Ecology and Environmental studies.

The course participants have to be duly sponsored by their university / institution and application should be forwarded through coordinators from respective Organisations/centres. Users attending programmes under CEC-UGC/ CIET / other networks can also participate. Institutions on high speed National Knowledge Network (NKN) can also participate using A-VIEW software.
