About the workshop

SIP-EIT Support for International Patent Protection in E&IT (SIP-EIT) – II for Micro, Small and Medium Enterprises and Technology Startup Units.

In India, most of the SMEs find it difficult to protect their Intellectual Property due to high cost involved in IPR protection. This is especially true in case of international filing which is necessary for companies to be globally competitive. Although national filing of IPR has picked up enormously in India, but applications from Indian ICTE companies constitute only a fraction of total applications filed with Indian Patent Office. Similarly, international applications from Indian owned companies are far less than those filed by top filing countries, although the situation has considerably improved during last 2-3 years.

SIP-EIT is a scheme initiated by DeitY for providing financial support to startups and MSMEs to strengthen their competitiveness through innovation and its protection.

The workshop is aimed to create awareness on patents and its advantages and Overview of patent system and processes. A Discussion on obtaining a patent is done.

Topics to be covered

- Role of E&IT in India
- Opportunities and challenges in the domain of E&IT
- Patents received and filling of patents in E&IT
