

VISION AND MISSION:

Vision:

To inspire student members to become future leaders in the field of Geotechnical Engineering to serve the society.

Mission:

- Nurture the student members with fundamental engineering knowledge, a broad set of skills, and an inquisitive attitude for creating innovative geotechnical solutions to serve industry and community through guest lectures, quiz programs, seminars, workshops and conferences.
- Imbibe excellent oral and written communication skills in student members through lectures, group discussions, debates, newsletter preparation and technical report writing.
- Develop leadership skills and interpersonal skills of student members by organizing various events such as social gatherings and outreach activities.
- Expose student members to real time problems by conducting field/industrial visits
- Encourage student members to organize/participate in annual programs along with student chapters of other colleges
- Encourage student members to make use of online materials from ISSMGE/IGS and other related sources for enhancing their geotechnical knowledge.
